

The Basics of Shaping Artificial Trees

From this...

SHAPE IT TILL YOU MAKE IT

To this!

Recommended Tools

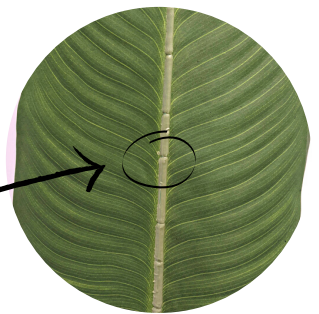

- Unpackaging tool
- Long item to curve leaves, any writing utensil will work
- Reference photo of tree from our website or google

How to Read a Tree Map

The tree map is located on the back of the leaves and sometimes the stems of our artificial trees, Locate the little divets on the leaves and/or stems of the tree. Slightly bend using your tool. To give the tree a more natural shape, try to avoid over bending.

Locate the divets

Curving Artificial Leaves

To create the natural bend in the artificial leaves we start from the base underneath the leaf, and use our tool to gently glide along the stem while holding the top of the leaf steady. Once shaped, you can insert the two loose leaves into the Travellers Palm stems.
